

Green Your Cleaning at Home

In 2001, in collaboration with The Deirdre Imus Environmental Health Center[®], HackensackUMC implemented the Greening The Cleaning[®] program. To the greatest extent possible, traditional cleaning products were replaced with less toxic alternatives in an effort to help protect the health of our patients, team members and community.

You can do the same at home. Choose cleaning products formulated with plant-based ingredients like glycerin or coconut oil-derived detergents to help make your home a healthier place.

Ingredients to Avoid

Chlorine
Antibacterials
Triclosan
Ammonia
Phthalates
2-Butoxyethanol
Sodium Hydroxide
Perchloroethylene ("Perc")

Potential Health Problems

Asthma
Cancer
Respiratory Issues
Chemical Burns
Poisoning
Reproductive Issues
